Why not **join the ranks of high earners** by becoming **a better oil trader**?

## YOU CAN DO IT!

## ANYONE CAN DO IT!

# Online Trading Academy Ltd

Crude Oil is a benchmark, not only on Oil itself, but also on the well-being of many Countries, Organizations & Governments.

The Crude trading market is one of the most volatile markets among all commodities, and one that has huge trading volumes worldwide with tremendous profit earning potential for traders, globally.

The opportunity to trade on Crude Oil exists perpetually, whether the price is $150 a barrel or $20 a barrel, whether the Price is rising or falling, whether we are in a 'BULL' or a 'BEAR' market.

Enclosed is the cumulative trading performance.

BRETCROWN TRADING LTD

# Online Trading Academy Ltd.

The Online Trading Academy is launched in two phases.

The first phase will be a Graduate course conducted Online, where the participants will be taught the various trading techniques that we follow.

The participants graduate as a 'Master Trader', where he /she will have the tools to successfully trade the Crude Oil markets with increased profitability.

In the second phase, the 'Master Traders' will be given an opportunity to take an Advanced Course and apply as an apprentice in different trading firms, where they will be taught proprietary techniques to participate & trade on a profit-sharing basis.

# Online Trading Academy Ltd.

## Phase – One: Online sessions -

➢Course Duration: 20 hours spread

➢over 4 weeks at one hour each

➢trading day in Weekly sessions

# Online Trading Academy Ltd.

## Phase – One: Online sessions –

### Course Content:

The statistics say that over 75% of the retail traders are unsuccessful in this volatile market.

Our trading techniques are very effective as they are based on certain unique characteristics of Crude Oil and key Geopolitical factors among other proprietary keys, with the result that the rate is reversed with over 75% being successful.

# Online Trading Academy Ltd.

## Phase – One: Online sessions –

### Course Content: 1.) Crude Oil day:

Cycle:  Crude Oil follows certain predictable movements across different trading time zones.

We take advantage of these predictable movements, starting with the Asian trading time zones, to the European trading time zones, and subsequently to NYMEX in the USA.
We have developed certain unique indicators for the Metatrader platform, which identify these different time zones and enable us to make trading decisions that are more precise.

## Phase – One: Online sessions –

### Course Content: 2.) Pivot levels:

Pivot levels are followed by Floor traders which act as effective levels of Support/Resistance. These are based on standard calculations of price range, which are followed worldwide.

But Professional traders/Institutions/Banks have different interpretations which the average trader is not aware of.
For example, using Weekly Pivot levels can give better levels of support/resistance, which is one of the different ways that we use these Pivot levels.

### Course Content: 3.) Divergence:

This is the primary setup, which is used by Banks/Institutes to trap the retail traders. By using this technique, we are trading along with the professionals.

But we trade only the "Class A' divergence which is created by the Institutes. This is the strongest type of divergence & usually indicates a sharp and significant reversal of the trend.

### Course Content: 4.) Fibonacci ratios:

The Fibonacci ratios are often used in the financial markets to identify strong support/resistance levels.

They can accurately anticipate the major turns in the market & identify key turning points for tops and bottoms… only if you know how to interpret them correctly.

The truth is most traders seldom use Fibonacci ratios properly.

We use certain 'Institutional ratios' which most traders are not aware of…. again, to keep our trades aligned with the professionals.
